# Move Away from Repair and Replace and Toward Predict and Prevent.

Together, JMI Reports and Betterview are bringing innovative solutions and state-of-the-art technology to help insurance companies and MGAs leverage actionable data to speed up their workflows and improve the bottom line.

## Predict and Prevent Future Losses

Protect your blindside by knowing the true condition of a property prior to policy issuance. Leverage historical data, images and get risk scoring to understand which properties pose the greatest risk of loss now and a predicted probability of loss over time.

## Improve Your Underwriter Efficiency

Risk scoring and actionable, data-driven risk reporting reveal property condition, often without even stepping on the property. Plus, you can prioritize when an in-person inspection is absolutely critical.

## Deliver Better Customer Service

Reduce the review time and quote cycle time for policy submissions with the benefit of better transparency with your policyholders throughout the process.

## Validate Data from the Policyholder.

With a greater need for versatility and flexibility in approaching your property inspections, getting critical information from your insured—from square footage and roof age to exposures and real-time photos—is easier than ever to help you validate data and price accurately.

QuickVUE™ Verified Underwriting Elements featuring **InVisionIQ** helps you:

- Get rich data
- Validate it through remote property assessment by the insured
- Get boots on the ground, only when absolutely needed
- Gain actionable risk insights
- Boost your bottom line

## Bottom Line? We Improve Your Bottom Line.

Contact us to learn more about how JMI can improve your loss ratio and sign up for a free QuickVUE™. Visit [jmireports.com/quickvue](http://jmireports.com/quickvue).

### Condition Evaluation

From roof shape and material to measuring the severity of damage, ponding, rust, and tree overhang.

### Property Characteristics

Quickly determine physical characteristics including pool, trampoline, fencing, etc.

### Building Footprints

Quickly and easily get all the measurements you need to properly assess a property.

### Common Regional Perils

Understand a property's exposure along with hints of how it will fair during inclement weather.

### Defensible Space

See and act on Defensible Space surrounding properties. Predict and Prevent damage from CAT and severe weather events.

### Building Permits

Easily see all of the permits that have been filed for the property.

### Assessor's Data

All the basics without navigating the ugliest websites on earth. We've got you covered.

## About JMI Reports

JMI Reports is a risk innovator providing property profiles and data insights to improve efficiencies and profitability for insurance carriers and MGAs. For more than 30 years, our mission has remained the same: to protect your blindside by listening to your needs and by delivering actionable, forward-thinking, and cost-saving solutions that make a difference.

## Betterview About Betterview

Betterview is the Property Intelligence & Risk Platform that leading P&C insurance companies depend on to identify and mitigate risk, improve operational and inspection efficiency, and build a more transparent customer experience throughout the policy lifecycle. By empowering insurers to automate pricing, underwriting, and renewal while focusing strategic action on critical properties, Betterview is transforming the insurance industry from Repair and Replace to Predict and Prevent.
